TDS-186-2

Technical Data Sheet

Product: Snap'Em Gel

Product Function: Food attractant for rodents

Description:	Snap'Em gels come in four tempting flavours and are made with food grade baits that are proven to be very attractive to rodents. The food attractant gels are supplied in preloaded syringes, which can be used individually or in combination with a bait gun.
Active Ingredients:	Food grade bait of aniseed, chocolate, curry or peanut flavouring
Longevity:	4 - 6 weeks
Dispenser:	30ml tube
Packaging:	Box of 12 syringes

Trap Application:
Take off the lid and place plunger into the back of the syringe. Dispense a pea-sized amount onto the trap of your choice. Do no apply directly onto toxic bait or use with other food attractants.

When to Use:
Can be used all year round when rodent infestation is detected.

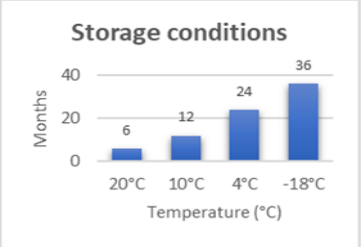

Trap Density:
Place the trap with the lure close to where rodent infestation is suspected or where recommended as part of a monitoring programme. The attractant can be used in food processing and storage facilities, factories, warehouses, offices, schools & hospitals.

Replacement:
Replace lure every 4 -6 weeks.

Storage

Store in a cool, dry place out of direct sunlight.

- When stored in a cold room of 10-20°C, this product will last 6 months.
- When stored in a refrigerator at 4-9°C, this product will last 12 months.
- When stored in a freezer at -18°C, this product will remain effective for 24+ months.

Precautions

- Handle carefully, avoid extensive contact by hand and wear gloves when handling.
- Do not eat or drink while handling this product.
